Full name: Kazem Abusitta
Country: Algeria
Address: Sidi Bel Abbes 22000
Email: kazemzidane@gmail.com
Phone number: 00213674744266

Responsibilities:
Maintain the company's current applications or scripts.
Develop fresh code for new applications or pick up on old code.
Debug applications to find vulnerabilities or weak points/errors.
Fix bugs in the application caused by logical errors in the code.
Work with a team and together solve complex problems.

Strengths:
Strong C++ programming and debugging knowledge. Especially Windows applications.
Intermediate HTML/CSS/JavaScript knowledge.
Familiar with Java, Python, Bash and the Linux terminal.
Compilers or Text Editors I use: Visual Studio Community, Visual Studio Code, Sublime Text, IntelliJ, (VIM if necessary)
Can work extra hours and meet deadlines.

Traits and Characteristics:
Fun, mysterious and confident enough to interact and work with others as a team.

Education:
United Arab Emirates, GEMS Cambridge high school O levels.
A in O level MATH.
Youtube and online sources.

Overall:
3 years of C++ experience.
2 years of HTML/CSS/JAVASCRIPT Front stack experience.
You can find some of the projects I've worked on here https://www.github.com/thendbend
I've designed and created 2 websites and also made a Cyber Network Cafe Windows application using C/C++ winapi library.

If you are interested in seeing the websites and the application I made here are two videos.
